FOR IMMEDIATE RELEASE

Media Advisory

Freight Train Service to Resume between Irwindale and Pomona as Early as January 1, 2022

Freight track relocation in Glendora recently completed as part of Foothill Gold Line project

WHO:

Residents / Businesses / Local Stakeholders in cities of Irwindale, Azusa, Glendora, San Dimas, La Verne and Pomona

WHAT:

As early as January 1, 2022, the BNSF freight trains will resume service in the rail corridor from Irwindale to Pomona. This follows the recent completion of the freight track relocation in the city of Glendora, as part of the 9.1-mile, four-station Foothill Gold Line light rail project from Glendora to Pomona. The freight track relocation is necessary to make room in the corridor for two new light rail tracks for the future Gold Line trains.

The design-builder, Kiewit-Parsons JV (KPJV), had accelerated the relocation of the freight track within the city of Glendora as a result of an agreement that started in November 2020 to suspend freight service temporarily through the city through July 2021. Crews completed the relocation of approximately five miles of freight track between Barranca Ave. and Gladstone St. in Glendora. This accounts for the first of two segments of the project to undergo relocation. Once freight service resumes, the freight trains will utilize the newly relocated freight track in Glendora.

WHEN & WHERE:

Freight trains to resume service between Irwindale to Pomona along rail corridor as early as January 1, 2022.

WHAT TO EXPECT:

- **Freight trains will resume service as early as January 1, 2022.**
- Stay alert for trains.
- The freight train's horn will be sounded as it approaches each street crossing.

###

About the Foothill Gold Line Construction Authority – The Foothill Gold Line Construction Authority is an independent transportation planning and construction agency created in 1998 by the California State Legislature to plan, design and build the Metro Gold Line (currently referred to as the L Line) light rail system from Union Station to Montclair. The agency completed the first segment from Union Station to Pasadena in 2003 and the Pasadena to Azusa segment in 2015; both on time and under budget. The agency began work on the Glendora to Montclair segment in 2003. The Glendora to Montclair segment was environmentally cleared in March 2013 under CEQA and again in 2019 to allow the potential for phased construction. When completed, the extension will add new light rail stations in the cities of Glendora, San Dimas, La Verne, Pomona, Claremont and Montclair. The project may be built in phases, due to funding constraints. Major construction on the project segment from Glendora to Pomona began in July 2020 and is anticipated to be completed in 2025. The segment from Pomona to Montclair, including the Claremont and Montclair stations, is currently not funded. The Construction Authority is currently seeking the additional funding needed to complete the project to Claremont and Montclair.

The portion of the project in Los Angeles County portion is funded mostly by Measure M, along with residual funds from Measure R not used to complete the Pasadena to Azusa segment. San Bernardino County is responsible to fund their portion of the project to Montclair (in San Bernardino County). The State of California has provided \$300 million in funding through a TIRCP grant awarded in 2018 to both counties.
