Mr. Burner indicated that by identifying utilities requiring relocation as early as possible will avert potential delays during construction. Mr. Burner indicated that after a review of license agreements to determine financial responsibility for any required relocations, the cost of relocating most utilities will be included in design-build-finance contract and be managed by the design-build contractor. Mr. Burner proceeded to provide a summary of some possible utilities relocation.

Vice Chair Reyes inquired if the possibility of locating a bike path along the corridor had been considered as an enhancement for access.

Mr. Balian indicated that an Intermodal Study was currently underway to address possible bike interfaces but that a bike path along the entire alignment was reviewed several years ago and due to right-of-way limitations and limited widths of bridges that a bike path along the alignment would be difficult at best.
Vice Chair Reyes requested that an additional review be considered and that possible alternate routes be considered where impacts had been raised before.

Board Member Larramendi indicated that the Orange Line had placed bike paths along the right-of-way where possible and otherwise intermingled the bike path on streets.

Mr. Balian indicated that the Intermodal study would be available in the Fall of 2010 and would address some of these issues and would also be willing to provide a report to the Board on an upcoming Agenda.
