

I-210 BRIDGE BI-WEEKLY CONSTRUCTION NOTICE

OCTOBER 30 - NOVEMBER 12, 2011

WHAT: Construction activity on the center median of the eastbound I-210 Freeway may require partial eastbound lane closures.

WHEN: Occasional partial lane closures will take place between Monday, October 31, through Friday, November 11. Closures will start no earlier than 10 p.m. and will end by 1 p.m. the following day. No full freeway closures are anticipated for this bi-weekly period.

WHERE: I-210 Freeway eastbound lanes, between Rosemead Blvd. and Santa Anita Ave.

WHAT TO EXPECT: Temporary lane closures may cause traffic slowdown as construction crews continue work on the bridge's abutments. Abutments are the ends of the bridge, where it is anchored to the ground.

During the next two weeks, construction crews will build the foundations for the bridge's eastern abutment located in the southern shoulder of the eastbound I-210 Freeway (see approximate location in photo below). Following the drilling of 18 foundation holes for the eastern abutment, reinforcing steel cages will be installed, and then concrete will be poured. It will take about six work days to complete all 18 foundations. Crews will also continue work on the western abutment in the center median of the I-210 Freeway. Foundations for the western abutment have been completed, and now work will begin on the next step of the abutment construction. For safety purposes, partial lane closures of the eastbound I-210 Freeway may be required during the time work is performed in the center median.

Construction schedules are subject to change for various reasons including but not limited to weather conditions and unforeseen delays. Please note that other construction projects are also affecting the Arcadia stretch of the I-210 Freeway. To learn more about upcoming ramp and lane closures from these projects, be sure to visit the websites listed below.
