

I-210 BRIDGE BI-WEEKLY CONSTRUCTION NOTICE NOVEMBER 13 - 26, 2011

WHAT: Construction activity on the center median of the eastbound I-210 Freeway may require partial eastbound lane closures.

WHEN: Occasional partial lane closures will take place during this period. Closures will start no earlier than 10 p.m. and will end by 1 p.m. the following day. No full freeway closures are anticipated for this bi-weekly period. **No work will be performed on Thursday, November 24 and Friday, November 25, due to the Thanksgiving Holiday.**

WHERE: I-210 Freeway eastbound lanes, between Rosemead Blvd. and Santa Anita Ave.

WHAT TO EXPECT:

Temporary lane closures may cause traffic slowdown as construction crews continue work on the bridge's abutments (the ends of the bridge) and begin work on the bridge's columns.

During the next two weeks, construction crews will continue work on the bridge's eastern abutment located in the southern shoulder of the eastbound I-210 Freeway. Due to a change in schedule from the prior bi-weekly period, the drilling of the 18 foundation holes for the eastern abutment will commence this period, followed by the installation of reinforcing cages and the pouring of concrete to complete the foundations. Work will also continue on the western abutment in the center median of the I-210 Freeway. Work on the western abutment is anticipated to be completed during the last week of November.

Additionally, work is likely to commence on the first of the bridge's three columns (see photo below). The column "form" (the mold which shapes the column) will be erected around the existing reinforcing cage, followed by a concrete pour. The signature basket shape of the columns will be installed at a later date. For safety purposes, partial lane closures of the eastbound I-210 Freeway may be required during the time work is performed in the center median.

Construction schedules are subject to change for various reasons including but not limited to weather conditions and unforeseen delays. Please note that other construction projects are also affecting the Arcadia stretch of the I-210 Freeway. To learn more about upcoming ramp and lane closures from these projects, be sure to visit the websites listed below.
